https://www.linkedin.com/in/maximiliano-sá/

Information Security MSc student with a BSc in Computer Science and hands-on software development experience. Interested in Product and Network Security, secure software development, vulnerability management and privacy. Experienced with SQL, PostgreSQL, Node.js, REST APIs, Java and Python, with academic experience in encryption, privacy impact assessment and data anonymization. Analytical and detail-oriented, with experience in collaborating with stakeholders and working in a team-based environment. Adaptable, dedicated, fast-learning and eager to grow.

## WORK HISTORY

### **Instituto Português de Oncologia do Porto (IPO-Porto),** Porto, Portugal - *Full-Stack Developer Intern*

MARCH 2026 - JUNE 2026

- Designed and implemented a normalized PostgreSQL database, replacing an Excel-based workflow, improving data consistency, scalability and reporting.
- Automated data migration from Excel to PostgreSQL using Python, applying data validation and data-integrity checks to reduce manual processing.
- Built secure RESTful APIs with Node.js and Express.js to provide programmatic access and integrate backend services with internal tools.
- Developed a responsive CRUD web application using HTML, CSS, JavaScript to improve data entry and reporting workflows.
- Collaborated with researchers to gather requirements, document technical needs and deliver solutions aligned with operational requirements.

### **Núcleo de Ciência de Computadores da Faculdade de Ciências da Universidade do Porto,** Porto, Portugal - *Member of Pedagogical Department*

OCTOBER 2025 - OCTOBER 2026

Organising academic events, talks and workshops for the students of the computer science department.

## EDUCATION

### **Faculdade de Ciências da Universidade do Porto,** Porto, Portugal - *Master's Degree in Information Security*

SEPTEMBER 2026 - PRESENT

Expected Graduation: July 2028

### **Faculdade de Ciências da Universidade do Porto,** Porto, Portugal - *Bachelor's Degree in Computer Science*

SEPTEMBER 2023 - JULY 2026

## PROJECTS

### **LookoutIDS** - *(Python, Suricata, Discord API)*

Developing a network intrusion detection system that combines Suricata monitoring with custom Python detection logic and real-time Discord alerts. Focussed on implementing core detection features, testing network events and refining defensive security automation.
Repository: https://github.com/MaxSa2004/LookoutIDS *(Work in progress)*

## SKILLS

**Information Security**

Information & Network Security Fundamentals, Encryption, Security & Privacy Analysis, Privacy Impact Assessment, Data Anonymization

**Programming & Backend Technologies**

Java, Python, C, SQL, Haskell, MIPS assembly, HTML, CSS, JavaScript, Node.js, Express.js, JSON, APIs, SQLiteStudio, PostgreSQL

**Tools & Environments**

GitHub, Visual Studio Code, Linux/Unix, Jupyter Notebook, ARX Anonymization Tool, PIA-Privacy Impact Assessment

**Computer Science Fundamentals**

Object-Oriented Programming, Data Structures & Algorithms, Algorithm Analysis & Complexity, Computer Network Fundamentals, Relational Database Design

**Professional Skills**

Problem Solving & Analytical Thinking, Teamwork & Collaboration, Time Management & Prioritization, Adaptability & Learning Agility, Attention to Detail, Ability to Work Under Deadlines

## CERTIFICATIONS & TRAINING

**- Dale Carnegie Generation.Next**

Leadership, communication and personal effectiveness training.

**- Introduction to Cybersecurity**
(Cisco Networking Academy)

## LANGUAGES

English
Portuguese
